

TEXSKILL LEAN IMPLEMENTATION PROGRAM

To maximise the successful implementation of Lean into a Competitive Manufacturing Enterprise, Lean training should be conducted across the whole business. A Lean structure requires the understanding and support of the whole company from the CEO, managers, supervisors through to the floor staff.

TEXSKILL PROVIDE A
WHOLE OF BUSINESS
APPROACH

← CEO, CFO
Support to
implement change

← Department managers
Lean Leaders
(Graduate Certificate)

← Supervisors, Leading Hands,
Maintenance Department
(Certificate IV Competitive Manufacturing)

← Shop floor operators
(Certificate III
-including Lean Units)

In addition to the regular training a “Support Team” will be trained to assist the Lean Leader implement the necessary changes that will deliver the business improvements. This team consists of the Lean Leaders with support

from supervisors, maintenance personnel and operators. This team will receive additional training to enable them to support the leaders and the implementation of the changes.

The support team is ideally selected from a single value stream of the enterprise which is identified as being able to deliver the most important improvements to the business.

TexSkill can support your Lean journey by training your supervisors and floor staff in Certificate IV in Competitive Manufacturing and a Certificate III in the area of your choice featuring Lean units. In most cases TexSkill can help you in obtaining government funding to assist you to cover the costs of this training.

CERTIFICATE IV IN COMPETITIVE MANUFACTURING

- Delivered over 18 months.
- On site training to support participants in applying new skills to the workplace.
- Relevant resources containing workplace activities.
- Personalised support throughout the program.

job duties. This program can include training in Lean units which can provide them with the basic knowledge to enhance their understanding of Lean philosophies assisting them in supporting the company's Lean journey.

CERTIFICATE III

Shop floor operators can be enrolled into a Certificate III program that aligns with their
